The ambient noise level, for the purpose of this section, shall be the average of sound level meter ratings taken consecutively at any given time from four (4) or more diametrically opposite positions within an area of not more than five hundred (500) feet nor less than two hundred (200) feet from the oil field production equipment in question; all such readings to be taken at a distance and in a manner so as to obtain the surrounding

noise level as distinguished from the noise level produced by the oil field production equipment. However, if the ambient noise level is less than seventy (70) decibels, the production equipment shall not generate a noise level in excess of seventy (70) decibels measured at a distance of one hundred fifty (150) feet from such equipment.

(D) At a non-urbanized drilling site, the operation of oil field production equipment shall not generate a noise level in excess of eighty (80) decibels at a distance of one hundred fifty (150) feet from said production equipment. (Ord. of 3-11-80, §26)

No well shall be drilled within the city limits without cementing the surface casing by the pump and plug method with sufficient cement to completely fill all of the annular space behind such casing to the surface of the ground; and without cementing the production string by the pump and plug method with sufficient cement to completely fill all of the annular space behind the production string to at least five hundred (500) feet above the highest oil and/or gas bearing horizon. In the event a protection string of casing be required under the terms of this article, said protection string shall not

be installed without cementing the protection string by the pump and plug method with sufficient cement to completely fill all the annular space behind the protection string to at least five hundred (500) feet above the highest oil and/or gas bearing horizon. (Ord. of 3-11-80, §80)

Prior to the time the well reaches a total depth of five thousand (5,000) feet or the depth of the first known or encountered oil or gas bearing horizon whichever is the lesser depth, the weight of the mud laden drilling fluid shall be at all times maintained at a weight sufficient to contain the formation pressure. After the well reaches a total depth of five thousand (5,000) feet or the depth of the first known or encountered oil or gas bearing horizon, whichever is the lesser depth, the weight of the drilling fluid shall be maintained to provide a hydrostatic head necessary to contain the formation pressure. In reworking a well the drilling fluid shall be at all times maintained at a weight that will provide a hydrostatic head necessary to contain the formation pressure. (Ord. of 3-11-80, §32)

Sec. 5-183. Testing restrictions.

It shall be unlawful for any person in connection with the drilling or reworking operations of any well within the city limits to complete any drill stem test or tests except during daylight hours and then only if the well effluent during the test is produced through an adequate oil and gas separator to storage tanks, and the effluent remaining in the drill pipe at the time the tool is closed is flushed to the surface by circulating drilling fluid down the annulus and up the drill pipe. (Ord. of 3-11-80, §33)

Sec. 5-184. Tubing quality.

All tubing used in any well within the city limits shall be seamless steel tubing meeting American Petroleum Institute standards for minimum internal pressure yield strength. (Ord. of 3-11-80, §34)

Sec. 5-185. Bradenheads.

Each well drilled within the city limits shall be equipped with a bradenhead with a working pressure sufficient to contain the formation pressure. Bradenheads shall not be welded. The bradenhead pressure shall be checked at two (2) or more times each calendar year and if pressure is found to exist, proper remedial measures shall be immediately taken to eliminate the source and the

existence of the pressure. (Ord. of 3-11-80, §35)

Sec. 5-186. Christmas tree and well head connection maintenance.

The Christmas tree and all well head connections on each well existing within the city limits and on each well drilled pursuant to a permit under this section shall be

BUSINESS AND OCCUPATIONS

maintained so as to operate safely. If a Christmas tree or a well connection is found to be leaking or otherwise ineffective, the chief building inspector may immediately revoke the permit. In the event the surface shut-in pressure of any well in the city limits exceeds two thousand (2,000) pounds per square inch, the flowing of the Christmas tree shall be equipped with an automatic closing safety valve in addition to the regular control valves. (Ord. of 3-11-80, §36)

Sec. 5-187. Compressor station shutdown devices and other precautionary measures.

The compressor station on each well existing within the city limits and on each well drilled pursuant to a permit under this section shall be equipped with an automatic shut-down device which shall be clearly marked and visible at all times. The compressor station and all pipes and valves connected thereto must meet or exceed the minimum internal pressure yield strength established under American Petroleum Institute standards and shall have prior to installation unconditionally passed a complete cold water test. All compressor stations shall be checked a minimum of once each three (3) months and the result of said check shall be sent to the chief building inspector upon request. Failure to comply with this section shall result in immediate cancellation of the drilling permit issued hereunder. (Ord. of 3-11-80, §37)

Sec. 5-188. Tank restrictions and requirements.

Except as provided in section 5-161 herein, within one thousand (1,000) feet of any occupied structure a maximum of two (2) five hundred (500) barrel tanks for crude oil storage may be constructed in connection with any one producing well within the city limits. There shall be no limitation on the size or number of storage tanks that may be constructed in the area more than one thousand (1,000) feet from any occupied structure. Each tank shall be equipped with flame arresters and shall be so constructed and maintained as to be vaportight. Each tank or tank battery shall also be surrounded with an earthen fire wall which shall at all times be free of vegetation and which will be at such distance from the tank as will under any circumstances hold and retain at least one and one-half (1-1/2) times the maximum capacity of such tank. The area outside each tank but contained within the earthen fire wall shall be properly drained at all times. A permittee may use, construct, and operate a steel conventional separator, and such other steel tanks and appurtenances as are necessary for treating oil, with each of such facilities to be so constructed and maintained as to vaportight. Each oil gas separator shall be equipped with both a regulation pressure relief safety valve and a bursting head. (Ord. of 3-11-80, §38)

Sec. 5-191. Monitoring inspector .

A well site inspector to be designated by the chief building inspector shall be responsible for the monitoring of drilling and production activities both at scheduled intervals and at any other times he may deem necessary to ensure the public safety and to ensure compliance with the term of this article. (Ord. of 3-11-80, §41)

Sec. 5-192. Time restriction on delivery of equipment and supplies .

Whenever practicable on an urbanized drilling site all delivery of equipment and supplies to the drill site shall be made only on Monday through Saturday between the hours of 8:00 a.m. and 6:00 p.m. This requirement shall not apply to drilling operations being conducted in a non-urbanized area. (Ord. of 3-11-80, §42)

Sec. 5-193. Transportation of oil and gas restricted .

When production has been established in any new well, the construction of a pipeline shall be started as soon as practical and economically feasible and thereon diligently prosecuted until such pipeline is completed in order to eliminate the trucking of oil. All oil and gas shall be shipped and transported through pipelines after those pipelines have been completed, except in cases in which such a method of transportation is found by the chief building inspector to be unfeasible. In such cases the shipping and transportation of oil by truck may be permitted at the discretion of the chief building inspector after consideration of all the circumstances including, but not limited to, the proximity of the well to existing and available pipelines, the availability of acceptable access routes to the drill site, and the frequency and size of transportation vehicles required to serve the well. In the instance of an oil spill, permittee may bring in a vacuum truck to clean said spill without the necessity of obtaining permission from the chief building inspector. (Ord. of 3-11-80, §43)

Sec. 5-194. Producing or nonproducing status of well.

(Ord. of 3-11-80, §44)

Sec. 5-195. Well abandonment requirements: removal of derricks when production started.

If a well is to be abandoned, the following requirements are applicable:

- (A) Within ninety (90) days after the completion of drilling operations or abandonment of further drilling, the derrick and all drilling equipment, including temporary tanks, shall be removed from the drill site. Well abandonment shall be in accordance with the requirements of all applicable laws and ordinances. All holes or depressions shall be filled to the natural surface.
- (B) Drilling operations shall be prosecuted in a workmanlike manner until the well is completed or abandoned. Once a well is a producing well, it shall not be serviced with a permanent derrick.
- (C) The chief building inspector shall determine that the drill site and all facilities pertinent thereto have been restored to their original condition as nearly as practicable and that all requirements of this section have been satisfied.
- (D) After abandonment of a well by the operator, the drilling permit will be terminated if, to the satisfaction of the chief building inspector, all the conditions stated in this article have been fulfilled. (Ord. of 3-11-80, §45)

Sec. 5-196. Violations suspension or revocation of permit: appeals.

Any drilling permit may be suspended or revoked for any material violation of the conditions of the permit by the permittee or for persistent violation of any law by the permittee in the operation of any such well. The chief building inspector shall not revoke any permit without

first giving the permittee ten (10) days written notice of the nature of the violations and the intention to revoke such permit. Permittee shall at once cease drilling operations after receipt of notice of intent to revoke this permit. If, within such ten (10) day period, the permittee requests a hearing before the chief building inspector, the chief building inspector shall grant such hearing within fifteen (15) days after the date of such request. At such hearing, evidence shall be presented to establish to the satisfaction of the chief

BIG SPRING CITY CODE

building inspector the extent and nature of the violation which constitutes grounds for the revocation, and permittee shall be given an opportunity to cross-examine all witnesses testifying at such hearing. The permittee shall thereafter be permitted at that hearing, or at a continued hearing, if a continuance is requested by the permittee, to present evidence to disprove or explain such alleged violations.

The chief building inspector shall thereupon, after hearing all the evidence, determine whether or not the permit should be revoked, and his determination thereon shall be final. If the chief building inspector determines that the permit should be revoked, permittee may appeal the decision of the chief building inspector to the building board of adjustment and appeals in accordance with the ordinances of the city. In the event that the building board of adjustment and appeals determines that said permit should be revoked, permittee shall have recourse to the appropriate courts of this state to review such action by said building board of adjustment and

appeals and the substantial evidence rule shall apply. (Ord. Of 3-11-80, §46)

Sec. 5-197. Penalty.
